Miss Landahl of Oak Lawn Is An Easter Bride

The wedding of Gertrude Landahl of Oak Lawn and William March of Chicago, celebrated during the Easter season at St. Gerald's church at Oak Lawn, on April 23rd will long be remembered by all who witnessed it. The church was crowded to the floor with friends and relatives of both bride and groom.

The bride wore a beautiful dress of white crepe Elizabeth trimmed with pearls and crystal beads, and a silk embroidered veil, the head piece of which was a crown of orange blossoms.

The bridesmaids, Elizabeth Philbin of Oak Lawn, wore a rose pink flat crepe, and Eleanor March of Chicago, the groom's sister, wore a dress of baby blue flat crepe. They had silver leaf wreaths on their heads.

The two little flower girls, neices of the bride, helped make the wedding a colorful one. Abigail Philbin had a canary yellow taffeta and Wanda Wright, an orchid taffeta.

The groomsmen, Robert Landahl, Jr., the best man, Martin Depner of Chicago, and also the groom, were in full dress.

The bridal procession marched up the aisle of the church to the tune of Lohengrin's Wedding march, where the bride was given away by her father.

High Mass was celebrated, Rev. P. J. Geraghty officiating, at ten o'clock in the morning, with four altar boys serving. Father Geraghty delivered a wonderful sermon on the sacrament of matrimony.

The mass was sung by Mrs. Wright and Mrs. Brandt, sisters of the bride and Mrs. Fernandez. Mrs. Philbin, also a sister of the bride, played the organ. Mrs. Wright sang "I Love You Truly" and "Oh, Promise Me."

After the ceremony, a reception was held in the church hall where eighty guests were served and every one had a wonderful time.

The bride's mother, Mrs. Robert Landahl, gave her last single daughter, an extraordinary send-off.

The gifts were all beautiful and too numerous to mention.

Mr. and Mrs. March, the wedded couple, will reside in the Hermosa apartments in Chicago. They had their home furnished and ready to live in.

Ben Wieland Dies At Aurelia, Iowa

The following article, taken from the Aurelia, Iowa, paper, is of a former Mokena resident, Ben Wieland. "Ben Wieland another of the pioneer men of this community, was called by death last Saturday afternoon, April 16. He had been in failing health the past seven years but had been up and around until three days previous to his death. He had been a resident of this community the past forty-six years, living in Afon township for many years and the past nineteen years in the town of Aurelia.

"Ben Wieland was born in Switzerland, January 15, 1852. Departed this life at his home in Aurelia, April 16, 1927, aged 75 years 3 months and 1 day.

When an infant he came with his parents to America and settled in Will county, Illinois. When 15 years of age he was confirmed in the German Evangelical church of Mokena, Illinois.

On March 14, 1879, he was united in marriage to Miss Dora E. M. Reckoff. To this happy union five sons were born, one of whom died in infancy. Frank of Heron Lake, Minnesota; and Will, Fred and George of Aurelia; an adopted daughter, Mrs. Eric Larson of Alta, Iowa.

In March 1881, he came to Iowa and settled on a farm in Afon township, where he lived until March, 1908, when he retired from active farming and moved to his present home in Aurelia.

"He is survived by his wife and four sons and one daughter; four grandchildren; one brother, Fred Wieland of Mokena; one sister, Mrs. Elizabeth Cole of Joliet, and many other relatives and friends.

"Mr. Wieland's health began to fail some seven years ago and he began to fail quite rapidly about six weeks ago and though suffering greatly at times, he was patient sufferer and awaited the coming of the death angel with a firm confidence in Christ his Saviour.

"Through the years he was a kind and loving husband and father and a loyal neighbor and friend who will be greatly missed by all.

"Funeral services were held at the German Evangelical church in Aurelia Tuesday afternoon in charge of Rev. Schuman of Pomeroy, who was assisted by Rev. Moore of Aurelia. Burial was made in the Aurelia cemetery.

"Relatives from a distance attending were Frank Wieland of Heron Lake, Minn.; Mr. and Mrs. Eric Lar-

Wedding of Miss Verena Stelter, Social Event

The formal wedding of Miss Verena Stelter to Mr. Rudolph Meyer of Coopers Grove, was solemnized in Bachelors Grove church, Sunday April 24, the Rev. Wm. Greve officiating. The altar was a profusion of pink roses, Easter lilies and ferns.

As the first strains of Mendelssohn's wedding march pealed forth the bridal procession advanced to the altar led by the bridesmaids Miss Elsie Meyer, Cecelia Stelter and their escorts Mr. Wm. Hebbing and Raymond Stelter, followed by the bridegroom with his best man, Mr. Gustave Meyer, then the maid of honor Miss Dorothy Koehler of Chicago. The maid of honor and bridesmaids wore dainty dresses in pastel shades with silver head bands, they carried bouquets of roses to match the color of their gowns. Then the flower girl, Lillian Matthes who was like a doll in ruffled pink crepe-de-chine carrying a white basket filled with pink sweet peas. As the bride appeared on the arm of her father Mr. Ernest Stelter, "Here comes the bride" was played. Verena was lovely to look upon in her wedding dress of embroidered georgette and point lace trimmed with brilliants.

Her ten foot tulle veil had a diadem of brilliants and lace with clusters of fragrant lilies of the valley. She carried a shower bouquet of white roses and lilies. The ceremony was most impressive, at its conclusion the bridal party numbering 175 drove to the Stelter home where a reception was held and a dinner was served.

It was a Rainbow wedding, the dining room was artistically decorated with ribbon streamers harmonizing with the rainbow colors with great white wedding bells suspended from the ceiling. There were large baskets of pink roses and large branches of orange blossoms every where. The tables had pyramid cakes for centerpieces, ribbon streamers and fancy place cards suitable for the occasion. Cakes and ice cream were in rainbow tints.

There was dancing too, for the great barn was converted into a ball room with wedding bells and streamers of rainbow colors. An Orchestra was engaged to furnish the music. Miss Stelter is one of Tinley Park's prominent young women and Mr. Meyer from one of Coopers Grove oldest families. The happy couple received gifts valuing hundreds of dollars. They expect to make Homewood their future home.

New Mayor of Tinley Progressive

The election of Wm. Funk as mayor of Tinley Park has pleased the people immensely. He is not only noted and appreciated as a man of fine principles but as a progressive citizen as well. The young men of the town are looking forward to a real backer in their athletic sports, and hope to see their aims for a baseball park realized.

Mr. Funk will proceed to beautify the town square as rapidly as possible, with the aid of the public, and there are other numerous advanced ideas for the betterment of the village that the newly elected mayor hopes to carry out.

Tinley P. T. A. Makes A Big Hit

The Petticoat Minstrels show given by the Ladies of the P. T. A. was a marked success both socially and financially as the house was packed both nights. It was very evident from the smoothness of the performances that the women put in long and tiresome hours of practice for it went off without a hitch; of course due credit must be given to the business manager Mrs. Miller and to Mrs. Swisher the coach for the shows success. As the curtain went up, "Our" Red Pirate Orchestra struck up a lively air.

To much praise cannot be given these young men for their classy, up-to-date ability to produce real music that it is a joy to listen to; As to those who took part, they were all good, excellent; Baby Irma Hick was the star of the evening however this petite dancer, not yet out of babyhood. Helen Sandige as the interlocuter was charmingly dressed in white, a decided contrast to the black faced comedienne around her. As Endmen Mrs. Mager, Funk and Nielsen were especially entertaining, while Mrs. Boyer captivated the audience with her grace and lovely voice. Mrs. Anna Mesenbink at the grand piano was a scream, her daughter Esther was also fine in her character make up. Mrs. Clemens monologue was well given. Mrs.

son and daughter of Alta; a brother Fred, and a nephew, Joe Kohl both of Mokena, Illinois."

Mary Futon certainly acted the part of Mrs. Black, astonishingly well. It was fine! The minuet by our young girls was refreshingly sweet, as was the dancing and singing all through the show. Last but not least may we say a word of Clara Mayling in her "Kingdom Come". She acted the part of the cake walker negro to a finish, with her white trousers, silk hat and strut, yes! everybody said Clara was fine! The ushers represented Tinley Park's young men and they too deserve praise for maintaining order so well. The business people who advertised in the program must feel quite proud for they were well arranged. The show was fine. So let's boost the P. T. A.

Cook Co. Asks Wolf Road Be Built to Wheeling

The Cook County board of commissioners are favoring the construction of Wolf Road, Orland to the town of Wheeling and they have passed the following resolution by Commissioner Wm. Busse:

Resolution By Commissioner Busse
WOLF ROAD

State Aid Route No. 81
Be it resolved by the Board of Commissioners of Cook County that the State Division of Highways, Department of Public Works and Buildings, be and hereby is requested to add to the system of State Aid Roads of this City the following described Public Highway:

That portion of the Public Highway beginning at the South County line between Sections Thirty-one and Thirty-two Orland Township, and extending in a Northerly direction along Wolf Road to an intersection with the North County line in Sections One and Two Wheeling Township, a distance of forty-one miles, more or less to be known as STATE AID ROUTE NO. 81.

Be it further resolved that the County Clerk be directed to transmit to the State Division of Highways, Department of Public Works and Buildings of the State, a certified copy of this Resolution at his earliest convenience.

Adopted by the Board of Cook County Commissioners at a meeting held Monday April 18th, 1927.

Mokena Passes Another Wolf Road Resolution

The Ladies had their inning Monday night when the Mokena Development and Hard Road Improvement Association held ladies night.

Don C. Hall spoke of his trip to Springfield to have Rep. John M. Jenco introduce a bill to provide for the construction of Wolf Road for six miles under a special legislative act.

The association has been holding together well and Don C. Hall has largely been instrumental in keeping all parts well oiled to overcome friction.

However at Monday night's meeting everything was not running very smoothly for the chairman Ona E. McGovney stated that he felt there were members in the organization who looked on his efforts in the work of the association with suspicion and he felt that all his work was not appreciated.

When Mr. Hall saw that there was friction he quickly grabbed his faithful "oil can" and soon had the friction removed and things running smoothly.

The following resolution was unanimously passed and the chairman was asked to present same before the Will County Board of Supervisors at their meeting this week.

To the Honorable Chairman and Board of Supervisors of Will County, Illinois.

Whereas: The Mokena Development and Hard Road Improvement Association was, in accordance with resolutions adopted, organized for the purpose of securing the construction at the earliest possible moment of a hard surfaced road on Wolf Road from Route 44 to the Will, Cook, County Line, and

Whereas: The designation of Route 51 is over a distance of approximately 7 1/2 miles straight north from Route 44 on Wolf Road in Peotone Township to a point between Section five and six in Green Garden Township, and

Whereas: The Mokena Development and Hard Road Improvement Association have expressed themselves as favoring a referendum on the subject of a County bond issue in Will County, Illinois, therefore

Be it resolved that we request your Honorable Body, to include in the program of routings on maps of roads to be designate for construction under such bond issue, a hard surfaced road on Wolf Road beginning at a point near the Frankfort Township line between section five and six in Green Garden Township and extending due north on Wolf Road along the east side of section

thirty-one, thirty, nineteen, eighteen seven and six in Frankfort Township to connect with the projected South west Highway in Cook County.

The association has received word that the bill introduced in the legislature is now before the committee on appropriations. The association meets again next Monday night.

Following are a few notes received by L. G. Bruder, chairman of the publicity committee of this association and copy of letter he sent to Gov. Small regarding routing of route 51.

Downers Grove, Ill., April 11, 1927
L. G. Bruder,

417 S. Dearborn St., Chicago, Ill.
Understand development of Wolf Road will provide relief for some of my constituents in Will County, if so you may count on me to help.
Lottie Homan O'Neill."

April 12, 1927.
Hon. Len Small,
Governor State of Illinois,
Springfield, Ill.

My Dear Governor;

I am to-day in receipt of letter dated April 11th from the Hon. Col. C. R. Miller, Director of Public Works and Buildings advising me that Route 51 will be constructed according to the law thru Frankfort and which leaves Mokena without a hard road, altho the pavement on Wolf Road from Route 44 in the construction of Route 51 will continue due north on Wolf Road for a distance of over eight miles thus adding another link to the pavement on Wolf Road.

It is very discouraging not to have Wolf Road designated for Route 51 after the effort, time and money that has been spent to have Route 51 constructed on Wolf Road. We are no better off than when we started so far as a hard road is concerned and we therefore look to you for whatever assistance you are willing to give us to secure a hard road on Wolf Road.

Allow me to suggest and if it can be accomplished, that a bill be introduced in the present legislature for the construction of a hard road to begin at a point on Route 51 on Wolf Road due North on Wolf Road and to connect with the Southwest Highway which is to be constructed this summer by Cook County, and which would give also a connection with the Lincoln Highway and which would be a distance of about six miles.

I hope that you will be kind enough to give my request your valued consideration.

Very truly yours,
L. G. Bruder.

To Vote on New School House

A special election will be held Saturday April 30th, in school district No. 124 New Lenox township for the purpose of voting on the issuance of \$6,000 in bonds for the purpose of building a new school house. The old building is fast going to decay and it will cost more to repair it than to build a new building.

This school is located in the district known as the Mast school district.

Lankenau Relected Chairman Co. Board

Wm. Lankenau, supervisor of the township of Frankfort and who has been chairman of the Will County Board, was unanimously re-elected to this office by the board members at their session on Tuesday. Mr. Lankenau has held this office for two terms and has given a very fine service and on the merit of his past record he was returned with out opposition.

Herman Geiger of Mokena Passes On

Herman Geiger, aged 58 years, of Mokena, died Tuesday morning at 11:30 o'clock at the home of Mrs. Henry Daniels in Chicago, a step-sister. He suffered greatly with a cancer which finally caused his death.

Mr. Geiger was born at Mokena, November 24, 1868. He lived in the vicinity of Mokena all his life with the exception of about 8 years in Montana.

He is survived by two brothers, John of Minnesota and Joseph of Chicago, one sister Mrs. Kester also of Chicago, four step brothers, Fred and George Knudson of Mokena, Edward Knudson of Blue Island and Frank Knudson of Montana; three step sisters, Mrs. Kirby and Mrs. Daniels of Chicago and Mrs. Frank Liess of Montana.

Funeral services were held on Thursday afternoon from the home of George Knudson in Mokena, Rev. W. J. Cramer of the St. John Evangelical church officiating. Mrs. Mabel Mall and Miss Freida Zumstein sang several songs. Floral offerings were many and beautiful. Burial took place in Marshall cemetery northwest of Mokena.

Bond Issue a Special Order At 1:30 Friday; May Ask for Special Election

At the Wednesday morning session of the Will County Board a motion was made by Supervisor Phippen, that the Board should at the close of the Thursday afternoon session resolve itself into a committee of the whole for a consideration of the question of a bond issue. The motion carried and it was so ordered.

At the opening of the Thursday session an attempt was made to rescind the action taken on the Phippen motion. The attempt failed however as the vote was 22 to 16 in favor of the closed door session.

The result of the conference was not announced further than the motion that preceded adjournment which called for the subject of a bond issue as a special order for Friday afternoon at 1:30.

Apparently some members of the county board of supervisors now in session at Joliet, are not as thoroly impressed with the necessity of immediate action in securing a referendum on the subject of a county bond issue for hard road construction in Will County as they should be. This evidence of apathy is to be regretted. Action should be taken and the subject spread upon a ballot at the June Judicial election or at a special election called for the earliest possible date, to give the electorate an opportunity of expressing themselves upon this most important subject. Delay is retrogressive—for we are either going forward or backward.

It is not so much what we pay as what we get that counts. Are we to be two or three years behind our neighboring counties in improved roads facilities and conveniences, and advanced property values? The delay in taking care of this bond issue would mean a material loss to the residents of the county of Will of a sum far greater even than the amount of the bond issue itself with the small cost of the special election added—a loss which can never be regained for in this rapid age of advancement, we must keep the pace set by the far sighted and progressive or we are eternally left behind.

Let us hope that the board as a whole may awaken to the call of necessity, and that they will take quick and comprehensive action that we may "hook up" with our neighbors for a continuation of hard road distribution to the end that we may get at least our share of what we are paying for. Unless action is taken for immediate consideration at a special election no action then should be taken at all as the position taken by this board at this time would have no necessary bearing on the new board in 1928. Let's have an election on the bond issue. Everybody knows what they want, and just how they want to vote.

Mokena vs. Midlothian
Mokena will play Midlothian the first of the season base ball game Sunday at Schieck's diamond.

CHAPTER X—Continued

The yelling in the wood increased in volume as the False Faces followed the course we had taken by broken branches and footprints in the pine-mold. A misshapen figure with the head of some fabled beast squatted into the trail and galloped around, nose to ground like a hound seeking a lost scent. In a moment the ugly head was lifted, and a howl of satisfaction greeted the other monstrous shapes which joined it. The whole pack gave tongue and vanished up the trail after Marjory.

Ta-wan-ne-ars waited to give the stragglers time to appear, then rose and led the way along the bed of the stream westward.

We walked in the water for more than a mile, when the stream turned to the north and we stepped out upon a rock and dressed. Afterward we caught the overhanging bough of a tree and swung ourselves onto dry ground above the bank, never leaving a trace of our course up to that time. From this point we traveled on through the forest, pursuing no settled path, but holding to the westward in the direction of Oswego on the shore of the Cadarakul lake.

We did not stop until after midday. Ta-wan-ne-ars knocked over a wild turkey with his tomahawk, kindled a fire of dry sticks and broiled the juicy bird before the coals. He insisted that I should sleep first, promising to arouse me at the end of two hours—the declension of the sun. But when he finally did arouse me the sun was close to setting, and I saw by the sunken look of his eyes that he had not slept during his watch.

"Why did you not wake me?" I asked angrily.

"Ta-wan-ne-ars had no wish for sleep," he returned.

"Nonsense," I retorted. "You cannot go indefinitely without rest."

"I had my thoughts for company," he said simply. "They are not happy thoughts, brother. They would not let me sleep. Your search is ended, brother," he added.

"What do you mean?"

"The soul you sought has been found. It is no longer sick."

"Mayhap," I agreed, "but none the less 'tis out of reach and in great danger."

"We shall save it," he encouraged me. "Ta-wan-ne-ars knows. We must wait. The time will come."

He refused again to sleep, and we ate the remainder of the turkey—our hunger was prodigious—and pushed on, traveling most of the night. Not once did we see a trace of the Keepers, and when we halted Ta-wan-ne-ars said that we were on the marches of the hunting grounds of the Mohawks.

In the late morning we killed a rabbit, broiled and ate it and tramped the virgin forest until long past sunset. The following afternoon we caught our first view of the inland sea from a height of land, and the next morning we sighted the stockade of Oswego, the fort which Governor Burnett had established on the shores of the lake in his effort to divert the far-western fur trade from the French posts.

The gate was closed, but as we approached it opened, and an enormous, pot-bellied figure in buckskin and fur cap sauntered out to meet us.

"Ja, idt is you," Corlaer hailed us.

"What has happened? I have come here to scout der Doom Trail and learn how you diedt—andt you are alive."

So we told him, whilst the lieutenant in command of the post and his garrison of twenty lusty frontiersmen gathered in a knot to listen over each other's shoulders.

"Budt—budt," expostulated Peter, "you hafe been in La Vierge du Bois!"

"True."

"Budt nobody has efer been in La Vierge du Bois—"

"And come out alive," I amended.

"I fear many poor souls have been sacrificed by these fendish priests."

Peter insisted upon our repeating the tale with all details, and I believe he would have required a third account had it not been for the interruption which came during the afternoon.

We were sitting in the commandant's quarters on the upper floor of the blockhouse when the sentries on the stockade announced a large fleet of canoes approaching from the west. The lieutenant promptly issued orders to get out the trade goods, and prepared for an impressive reception of the savages, deeming them emissaries of some tribe come to exchange their fur catch of the winter.

"Hafe you a canoe?" asked Corlaer of the bewildered lieutenant. "Ja? Well, my friends and I will go and ask what this means."

We launched the canoe from the water-gate, and with Peter and Ta-wan-ne-ars at the paddles, sped out into the lake. Some distance from shore we overhauled the rear squadron of the fleet, every canoe loaded deep with packages of furs.

"Ho, brothers," called Ta-wan-ne-ars. "The chief of the English fort, who commands here in the name of

Ga-en-gwa-ra-go, invites you to come ashore and trade with him."

Up stood a large, stout man with lanky black hair, dressed in the uniform of the French marine troops, who had been ensconced behind a bale of furs.

"Ha, 'tis my friend from Arles," he shouted, "and his companion, the noble war chief! So the Keepers did not keep you?"

"No, Monsieur de Joncaire," I replied. "We are still alive to plague you."

"Ventre St. Remi, 'tis not sorry I am! Try it again, my lad. Only try it again!"

"And what are you doing with these people?"

He roared with laughter.

"No more than shepherding them past the temptations of the English."

Ta-wan-ne-ars called again to the Indians in the canoes.

"Come ashore, brothers. We have rich goods to trade with you."

"We do not need to trade with the English," a voice replied. "We are glad we can trade with our fathers,

wan-ne-ars deliberately. "If it succeeds it will set back the plans of Onontio and Murray."

"And if it does not, then you tell der governor Peter Corlaer tried once too often to get der joke back on Joncaire."

With which sage comment, Peter took himself off to arrange with the post commandant for drawing certain supplies we should require for this new expedition.

Two hours later an express left Oswego with dispatches for Governor Burnett, describing the situation at Jagara and our experiences at La Vierge du Bois, as well as the passage of Joncaire's argosy of furs, the greatest haul which had so far been made by either country that year on the frontier. Before the gate was slammed shut again we three slipped out and waved good-by to the garrison on the walls.

Our advance was cautious, and we parted company with Corlaer in some bushes, whence we could distinguish figures dancing around the flames and hear the distant yell of the guests of Joncaire as they caroused on his barge. The Dutchman stripped to his belt. Ta-wan-ne-ars relieved him of his musket, powder horn and bullet pouch, and I shouldered his clothes and pack.

"By der blasted pine—a goodt mile beyond der other side," whispered Peter as he waded into the water.

"You are sure you can stay afloat so long?" I asked with some misgiving.

"Ja," he said scornfully. "When you hear a noise like a fish rising three times, that is Peter."

He settled knife and tomahawk against either thigh, slung a spare flask of powder beside them, sank forward to his chin and began to cleave the water with powerful, overhand strokes.

"We must hurry, brother," admonished Ta-wan-ne-ars.

He started off at right angles with the path we had been following, and we fetched a circle around the group of fires, coming ultimately to a high point above the shore half a mile beyond them. Here we rested, both because our weariness was very great and because we desired to witness Peter's exploit, and, if need be, be prepared to aid him.

It was past midnight, and the fires had burned low and the brandy drinkers soaked themselves stupid. Not a sound came to us, except for the calling of a wolf from the heavy timber inshore and the croaking of water-birds.

"Twas Ta-wan-ne-ars' eagle vision which saw the danger signal. He gripped my arm."

"Look, brother," he hissed.

I looked, and a flame spurted upward between the fires and the water. There was a sharp explosion. A long minute elapsed, and then a chorus of excited yells rose, dropped and was sustained.

We listened for ten minutes, and whilst the yelling continued, with intermittent shooting, there was nothing to indicate triumph or satisfaction. In the meantime the flames which Peter had kindled, after flourishing grandly, gradually died out as the awakened savages removed those canoes which had not caught fire and threw water on such as were only smoldering.

Half an hour passed uneventfully. Then the steady lapping of the water against the beach was disturbed by the splash a fish makes in rising. It was repeated twice. Ta-wan-ne-ars leaned over and splashed the water thrice with his hand. A grunt boomed out of the darkness. Ripples spread in a widening circle, and a huge form stepped noiselessly ashore, ignoring our helping hands.

"Oof, that was a goodt joke on Joncaire," muttered Peter. "Some canoes I smash with der ax andt some I blow up with der powder andt more are burned. Where are my clothes? I am soaked like der muskrat."

"You were long in coming," said Ta-wan-ne-ars. "My brother is not hurt."

"Nein, nein. Oof, what a swim! I tell you I hafe bubbles under my skin! Ja!"

"Did you damage them much?" I asked eagerly.

Peter suspended the operation of struggling into his shirt and chuckled shrilly.

"I would gife much to see der face of that Joncaire when he counts his canoes andt der fur packs he has left. Twice now we get der joke on him."

Yet as he was, with the water dripping from his lank hair, he insisted upon quitting that dangerous locality at once. We tramped across country until the sun was high, and we stumbled upon an isolated family of Onondagas, who made us free of their gano-sote.

(TO BE CONTINUED.)

the French. They have plenty of goods to offer us. Onontio has sent word he will pay better than the English now."

"Ha, ha, ha," exploded Joncaire. "Ho, ho, ho! Mort de ma vie! Tonerr-rre de Dieu! 'Tis an odd world! Au revoir—andt avoid the Keepers. Avoid the Keepers by all means. I am told they keep a strict watch upon the Doom Trail these days."

His paddlers dipped their blades, and his bellows of laughter were wafted back to us as his canoe followed the fur argosy down the lake toward the French posts on the St. Lawrence—posts whose magazines were already beginning to swell with the life-blood of English trade which was pouring over the Doom Trail.

CHAPTER XI

We Meet Red Death and Black Death

"We must scout the Doom Trail," I said as we carried the canoe through the water-gate and deposited it within the stockade. "I will write the governor at once of affairs at Jagara and La Vierge du Bois. But this last business makes it necessary he should have sure intelligence of what passes to Canada."

"Ja," agreed Corlaer slowly. "Budt I hafe another scheme we might try first—tonight."

He surveyed the scores of dwindling canoes, their silvery birchen sides agleam in the sunlight, their dripping paddle blades shining as the paddlers drove them along.

"They will make camp by sunset at der point of der three rocks. That is eight—ten—miles from here. Ja, we can make it."

"Make what?" I asked impatiently.

"Der distance. Andt my plan."

"What plan, man?"

"To put der grin or der other side of Joncaire's face, by —! Now you listen."

And he outlined an undertaking which seemed absurdly simple until I chanced to look up and see that fleet of canoes clouding the eastern horizon of the lake.

"They are too many for us," I objected.

"Ja, if they know we come," he admitted. "Budt they do not."

"It is well worth trying," said Ta-

Plants Grow Rapidly in Continuous Light

Experiments in the use of intensive illumination as an aid to horticulture were made recently with 1,000-watt gas-filled lamps equipped with large reflectors. In every case the progress of the plants was remarkable, says a writer.

The plants were placed under the light when buds were just beginning to form. Daffodils and Lent lilies, when placed under the light for six hours a night, flowered in four days, growing about an inch a day.

The rapid progress of vegetation in the Arctic regions, once the sun has reached a fair altitude, has already been noticed by travelers. This is most likely due to the fact that daylight is continuous, although the presence of an unusually high ultra violet

content is probably an influential factor.

The same explanation may account for the rapid growth of wheat in regions such as Alberta, in Canada, where the whole process of sowing to harvesting has to be completed in five months.

Boy's Idea of Parsons

A youngster's essay on clergymen runs: "There are three kinds of clergymen, bishops, rectors and curats, the bishops tell the rectors to work and the curats have to do it. A curat is a thin married man, but when he is rector he gets fuller and can preach longer sermons and becoms a good man."—Boston Transcript.

PETER'S DENIAL AND REPENTANCE

LESSON TEXT—Mark 14:53, 54: 66-71; Luke 22:51, 62.

GOLDEN TEXT—Let him that thinketh he standeth take heed lest he fall.

PRIMARY TOPIC—Peter Grieves Jesus and Is Sorry.

JUNIOR TOPIC—The Story of Peter's Disloyalty.

INTERMEDIATE AND SENIOR TOPIC—How Jesus Is Denied Today.

YOUNG PEOPLE AND ADULT TOPIC—The Danger of Sudden Temptations.

1. Peter's Downfall (Mark 14:29-71).

This began when he refused to hear about the cross and ended when he, with a foul oath, declared: "I know not the man." When the disciples would no longer hear Christ's message about the cross, they not only ceased to grow in knowledge, but they began to deteriorate in moral discernment and were exposed to the possibility of the shameful denial of their Lord.

Steps in Peter's backsliding:

1. Overweening self-confidence (vv. 29-31).

His unwillingness to face the cross alienated him from Jesus and when apprized of the fact that the disciples would all forsake Jesus, Peter declared that Jesus was certainly mistaken, saying: "Although all shall be offended, yet will not I." Our condition is most perilous when we are most sure of our safety.

2. Sleeping at the post of duty (v. 57).

In one short hour the very one who was so confident of his self-sufficiency had fallen asleep instead of watching. The only way to escape from backsliding is to watch.

3. Lack of prayer (v. 38).

The legitimate inference from the Lord's words "watch and pray" is that He had commanded them to pray as well as to watch. The reason there is so little prayer is due to the lack of the sense of need of God's help.

4. Misguided zeal (v. 47).

Peter drew a sword and cut off an ear of a servant of the high priest (John 18:10) when they came to arrest Jesus. He was thus zealous for the Lord. He was trying to make up in outward service his conscious lack of communion.

5. Followed Jesus afar off (v. 54).

Christ's rebuke for taking the sword and the awkward position in which his act had placed him, caused him to follow afar off. He keenly felt Christ's reprimand. Following Jesus afar off got him into trouble.

6. Warned himself at the enemy's fire (v. 67).

This fire was built by those who had come unsympathetically to witness the crucifixion and even to mock in this tragic hour. For Christ's disciples to try to get comfort from the things prepared for the satisfaction of His enemies is sinful. Many professing Christians are living a life of compromise, even attempting to get pleasures out of the things which the enemies of Christ have prepared for themselves.

7. Open denial (vv. 66-71).

Step by step downward Peter went until the words of a servant girl provoked open and blasphemous denial. This even by one who had said: "If I should die with thee I will not deny thee in any wise." Peter's trouble began when he shrank from the cross. It was that shunning which separated him from contact with God. It should be remembered that there can be no backsliding until there be established a position from which to slip. Many of the so-called backsliders have never been born again.

11. The Repentance of Peter (Luke 22:61-62).

1. The look of Jesus (v. 61).

This was a most wondrous look. It was doubtless filled with pity and pain. Christ knew the trials through which Peter and the other disciples would pass and He prayed for them. This look brought to Peter the full consciousness of his cowardice and disloyalty and his blasphemous words of denial, and yet it displayed His pity and forgiving love.

2. Peter's bitter tears (v. 62).

The look of Jesus brought conviction of sin. It called to mind his boastfulness and cowardice. How awful must have been his condition as he went out that night into the darkness, little suspecting that there would be found a way to get back into communion with his Lord. Doubtless the message from the women as they came from the tomb brought the first good cheer to his heart. Christ said to them: "Go and tell my disciples and Peter." This encouraged him, no doubt, as it indicated Christ's particular consideration and love for him.

Two Things Needed

There are two things that they need to possess who go on pilgrimage; courage and an unspotted life.—John Bunyan.

Seeing and Talking

Men are born with two eyes, but with one tongue, that they may see twice as much as they say.—Cotton.

The Holy Ghost

No man is at his best until he is filled with the Holy Ghost.—Echols.

Have System of Levels to Reveal Altitude

Altitudes are obtained by a system of levels for the taking of which one requires considerable engineering knowledge and a set of instruments. There is also a method of estimating altitudes by means of tables worked out on the basis of the reading of the barometer. Differences of temperature affect the density of the air, and consequently exert a certain influence upon an aneroid barometer. This influence has to be taken into account when differences of altitude are being determined by the aid of this instrument. The table, showing allowances that must be made for temperature, most generally used is that prepared by Professor Alry, late astronomer royal of Great Britain, in which 31 inches of pressure represent the zero of altitude, assuming that the temperature is 50 degrees Fahrenheit.

Women's Employment

Among the many trades women have taken up for a livelihood in Great Britain is that of breeding goldfish. An Irish girl gets a living by breeding goats; Lady Rachel Byng breeds Angora rabbits. There are several women "masters of fox-hounds," a woman has chosen "tea tasting" for a living, another is a cattle judge and one young lady puts in her whole time as a master of harriers. A college girl has become "a scribe and heraldic illuminator," two others jointly earn a living by jam making on a large scale, two sisters run a small upholstery business, another is a builders' merchant.

Snow Cathedral

Along about Christmas time many Eskimos congregate at Lake Amadluk, on Baffin land, and one of the features of their holiday last season was an igloo church, a real arctic cathedral who has been nursing returned home.

St. Peter's church school has been moved over to the residence and will be remodeled to a garage.

Young People's Society of St. Peter's church met Friday evening at the church basement for a social. Games were played which was served consisting of an and cake.

and Mrs. Gerhold are entertaining their son, and his family of

Ladies Aid of St. Peter's held their monthly "coffee" church basement Thursday on and evening.

Max Haass expects soon to come from Silver Cross hospital where she recently underwent an operation.

Jenny Hossbach entertained heron Pinocchio Club at the her sister, Mrs. Homer

Had Idea Auntie Might Find Use for Dolls

Billy's aunt, who had been visiting the family, was packing up to go home. She had once suggested taking little sister's twin dolls with her, as a relief from the state of overpopulation that existed in the nursery, and Billy thought he was but doing his duty when he brought the dolls to the door of her room.

"Aren't you going to take the twins, Aunt Mary?" he inquired, with a triumphant glance at little sister's sorrowful face.

"Not this time," replied Aunt Mary. "I can't find a place to pack them now."

"I should think you'd want to take them anyhow. I should think you'd need 'em. Don't you think you'd better have 'em with you for bait?"

solicitously inquired her nephew.—Indianapolis News.

ORLAND

First Lieutenant John Tilsey, 318th N. S. Cavalry Reserve is attending the three months course for Reserve Officers at the Cavalry School at Fort Riley, Kansas. The Cavalry School at Ft. Riley is rated as one of the best mounted service schools in the world, and it is here that the Cavalry officers of the Regular army receive their technical training. Ft. Tilsey served as a private in the S. A. T. C. at the University of Illinois in 1918 and was discharged from that branch of the United States Army December 21, 1918.

In 1919 he returned to the University of Illinois and upon graduation in 1922 from the senior R. O. T. C. was commissioned a 2nd Lieutenant in the Cavalry Reserve of the United States Army. He has been an instructor at two C. M. T. Camps, at Camp Custer Michigan one in 1924 and one in 1925. While on this duty he has had several local boys under his command.

On December 7, 1926 he was promoted to a first Lt. of Cavalry, U. S. Army. He was ordered to the Cavalry school for a 3 months course March 9th to June 11th to represent the 6th corp area. This year there were only 6 Reserve Officers, out of a total of 3829, ordered to the Cavalry school from the whole United States.

Upon graduation he will return to an inactive status, being better fitted to serve his country as an officer in case of another great emergency.

ORLAND M. E. CHURCH NOTES
The Ladies Guild of the Orland Park M. E. church will meet next Wednesday, May 4th for an all meeting at the home of Mrs. Chas. Cooper. Postponement is due to school vacation, housecleaning, etc. All members are cordially invited.

The Orland Park High School is busy practicing for a play which will be given early in May entitled "Professor Pep." Watch for further announcements.

It is expected that the young people of the Orland Park M. E. church will soon give a play which they have spent considerable time in rehearsing.

The many friends of Rev. and Mrs. M. H. Neumeier, a former pastor of the Orland Park M. E. church will be interested to learn that Mr. Neumeier has been appointed Assistant Professor in Sociology at the University of Southern California, Los Angeles. Mr. Neumeier expects to begin his new duties in September of this year. Since leaving Orland Park M. E. church he has been an instructor in Sociology at the Chicago Training School and carrying on Research work in Sociology at the University of Chicago. His many friends will want to express their congratulations at his successful appointment.

At last the name "Orland Park" has become a reality in that it was painted upon the Wabash railroad station last Saturday. This undoubtedly gives the town a more "suburban" note so far as its name is concerned.

A new set of moving picture programs will be issued within the next few days by the Methodist church. The pictures will be given during the summer months at 8 p. m., daylight saving or 7 p. m., standard time.

It was announced at Sunday school and church last Sunday that the services and Sunday school next Sunday will be held at 9:30 standard time for Sunday school and 10:30 standard time for the preaching service. If the majority of the members and congregation desire to change these services to the fast time an opportunity to so indicate will be given.

The evening services will be held at 8 p. m. fast time or 7 p. m. on standard time during the months when Daylight Saving time is in vogue in Chicago and suburbs.

Next Sunday then, Bible school at 9:30 standard time. Morning worship 10:30 a. m. standard time. The ordinance of the Lord's Supper will be observed. Everyone invited.

In the evening the pastor will discuss a popular subject, namely, "What Mr. Ford Considers A Good Time". Do you know what America's richest man considers really a worthwhile time? Did you know that money has nothing to do with it? Come and learn something of interest from our multi-millionaire, Mr. Henry Ford of Detroit, Mich.

On the second Sunday Morning in May Mother's Day will be observed. All mothers and grandmothers are particularly urged to be present and to be honored at that service.

On Saturday, April 23rd some of the young people of the church went to the Spring Rally of the Southern District Epworth Leagues of Chicago and vicinity. An appetizing supper was served at the Thoburn M. E. church, 64th and Paulina Streets, Chicago. The special speaker of the evening was Professor Howard McClusky of the University of Michigan. Mr. McClusky is a favorite speaker at student conferences and conventions.

The monthly union intercommunity service was held at the World Community church last Sunday evening April 24th. The pastor of the Orland Park M. E. church spoke on Japan and this talk was illustrated by some 150 colored photographic slides. A special feature of the evening was a selection rendered by the choir of the Orland Park M. E. church. The next intercommunity meeting will be held at Orland Park on the last Sunday in May.

The Easter offering of the Orland Park M. E. Sunday school was \$50.85. This goes to missionary work of the Methodist Episcopal church and is the largest Easter offering ever received in the history of the local church. On Easter Sunday the attendance numbered 153 at Sunday school—also one of the largest if not the largest attendance in the history of this church.

ST. MICHAEL'S CHURCH NOTES

Rev. Wm. A. Gorey, pastor of St. Michael's church announced the Easter collection of \$430 and thanked the parishioners and all donating for their generosity.

Mr. and Mrs. I. Cleveland are receiving congratulations on the birth of a daughter.

Devotions, every Sunday evening at 8 o'clock in honor of the Blessed Mother, will be held throughout the month of May. These services will be completed at the end of the month, with the children's procession and the crowning of the May Queen.

OAK LAWN

Mr. and Mrs. George Fuller are the proud parents of a young son.

Frank Harnew wishes to thank all his friends for their help and support in electing him mayor of Oak Lawn.

Mr. and Mrs. Frank Jaklich and Mr. and Mrs. Jos. F. Ryan attended a party in South Chicago Saturday night.

Little Edward son of Mr. and Mrs. Ed. Prim is much better at this writing.

Mrs. Anna Hartman accompanied Father Gergathy to Sacred Heart cemetery and viewed the beautiful fence recently installed by the Rev. Father.

Services at St. John Lutheran church begin on Chicago time. Next Sunday school at 9:00 a. m. and English preaching at 10 a. m.

Married, April 24, 1927 Mr. August Kuehn and Miss Catherine Rehder at high noon in the home of Mr. and Mrs. John Steinfatt, Rev. J. H. Prange, officiating. The attendants were Edward Frederick and Freida Schwitter. Mrs. Steinfatt served a sumptuous dinner. Mr. Kuehn is employed by the Larson Coal Co.

Along the Concrete

Public Notice

At the annual meeting of the stockholders of the Bremen State Bank of Tinley Park, Ill., held on Jan. 8, 1927, a resolution was adopted, providing that the capital stock of said bank be increased from Twenty-five Thousand Dollars (\$25,000) to Seventy-five Thousand Dollars (\$75,000) 169 shares were represented at the said meeting and that 169 shares, at least two-thirds of all the votes represented by the whole stock of such association, voted in favor of the resolution.

John C. Funk, Secretary. c38

CRIPPLED CHILDREN CLINIC
Dr. John Mitchell will conduct a clinic for crippled children and adults on Wednesday, May 4th, between the hours of 8:30 and 12:00 a. m., in the Public Health Council rooms.

CHRISTIAN SCIENCE LECTURE

A free Christian Science Lecture is to be delivered Saturday evening, April 30 at 8 o'clock in the church Auditorium over the Stillman Drug Store at Joliet. Miss Violet Ker Seymour, C. S. of London, England, a member of the Mother Church in Boston, Mass., will be the speaker. The public is cordially invited to attend.

Foiling the Scoundrel

Put it out of the power of any one truly to report you not to be a sincere or a good man; let your practice give the lie; that is all very feasible, for, pray, who can hinder you from being just or sincere? To make all sure, you should resolve to live no longer than you can live honestly; for, in earnest, reason would rather you were nothing than a knave.—Marcus Aurelius.

Secret of Big Light Beam

In huge electric searchlights that cast beams visible for 50 or 60 miles on clear nights, the carbons are not like those of ordinary arc lamps. Instead, the electrodes are cored carbons containing chemicals in the cores. The main source of light is a small body of gas contained in the crater at the end of the positive electrode. This crater of gas quadruples the strength of the beam.

Computing Gross Tonnage

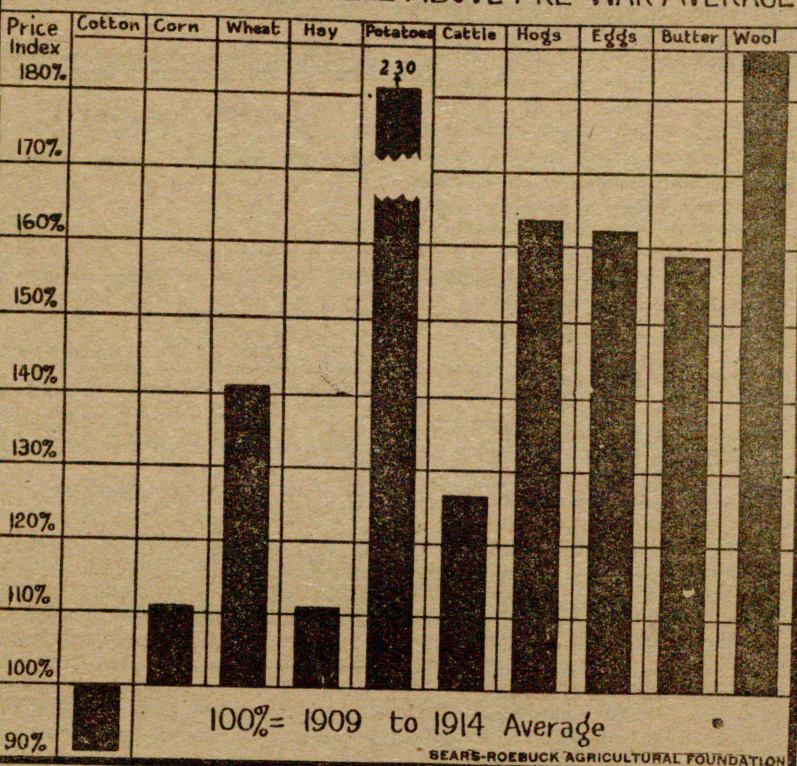

Gross tonnage is the sum in cubic feet of all the inclosed spaces of a vessel divided by 100.

Sandalwood

Sandalwood is used in ring and handkerchief boxes, and for the sticks of fans. Its delicate fragrance has made it extremely popular among women who dislike ordinary perfumes.

What Farmers Got for Products in 1926

MOST FARM PRICES WELL ABOVE PRE-WAR AVERAGE

WHAT the farmers of the United States got for their products during 1926 is revealed in a survey of the agricultural situation just completed by the Sears-Roebuck Agricultural Foundation.

Based on November farm prices, beef cattle brought cattlemen 26 per cent above the pre-war values, while in 1925 they brought only 18 per cent above those figures. The seasonal trend is down at this time, but indications point to further advances and a year from now cattlemen should receive more satisfactory prices, say the Foundation's observers. Hogs brought producers 64 per cent above the pre-war average prices, while in 1925 the figure was 47 per cent.

During November eggs put into the coffers of the poultrymen 62 per cent more than pre-war prices. A year ago they got 70 per cent. A decline also was registered in butter, the dairymen getting only 69 per cent above pre-war prices, as compared to 68 per cent last year.

In November, 1925, wool was selling at fancy prices, bringing growers 124 per cent above pre-war values, but by November, 1926, it had dropped to 87 per cent and the future trend is somewhat clouded by the surplus of cotton, of which there was a record crop this year, which reduced values to 9 per cent below the pre-war average. In

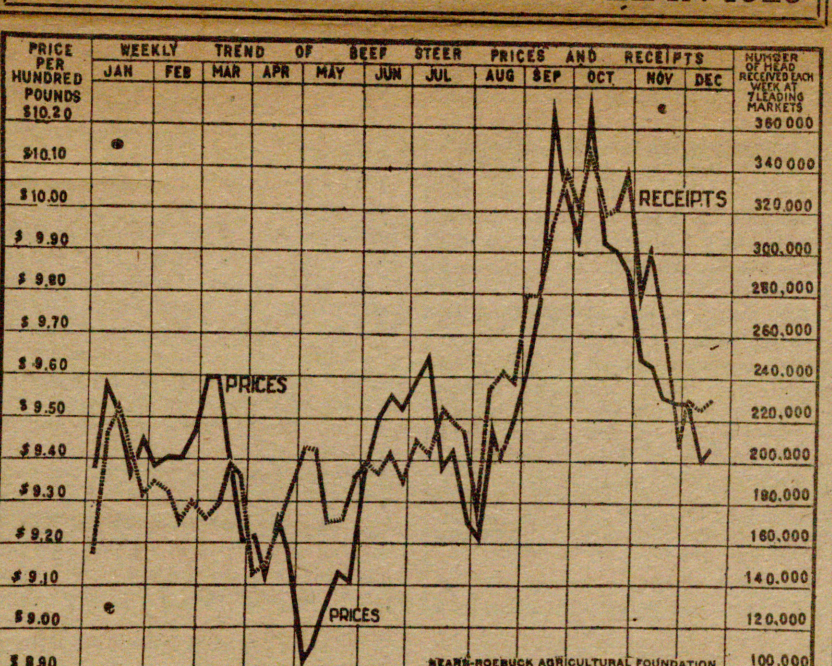

November, 1925, cotton prices were 46 per cent above the pre-war average, making a radical drop of 57 per cent in twelve months. The future trend of cotton depends largely on the acreage and size of the 1927 crop.

Grains as a class did not fare as well as meat animals. Corn sold in November at 11 per cent above pre-war prices, while a year ago it was selling at 16 per cent above. The outlook for the corn market is good, and a corn shortage is threatened before the 1927 crop is harvested, say the Foundation's experts. The large wheat crop of 1926 forced prices down in November so that they were only 41 per cent above the pre-war level, while in 1925 the prices reached 68 per cent above, due to the short wheat crop of that year.

Two short hay crops in succession and a shortage of live stock reduced the demand so that in November hay prices were only 11 per cent above pre-war level. This was one per cent greater than the preceding year. The present trend of the hay market is upward.

Potatoes sold in November at 130 per cent above the pre-war prices, which is 39 per cent less than recorded in November, 1925. Good prices are expected to rule for several months, but those for late 1927 depend on the size of that year's crop.

SURPLUS OF FAT BEEF CATTLE IN 1926

A SURPLUS of fat beef cattle was one of the outstanding features of the 1926 cattle situation, according to an annual survey just completed by the Sears-Roebuck Agricultural Foundation. The large corn crop of 1925 and a shortage in hogs caused this overproduction of fat cattle, resulting in lower prices, the survey states. Fat yearlings, thin cattle and she stock sold at fair prices all year, however, but western grass cattle prices suffered from the overproduction of grain finished cattle.

In September of 1926 the average weight of finished cattle was 957 pounds, as compared with 926 pounds in 1925 and a three-year average of 934. During the first nine months of 1926, the cattle slaughtered under federal inspection had a total dressed weight of 3,621,000,000 pounds in comparison to 3,565,000,000 pounds in 1925 and a three-year average of 3,470,000,000.

Cattle prices remained at relative-

ly low levels all spring and summer of 1926, but there was some improvement in the fall. In May the average price of steers was down to \$8.90, but in October the high point of average prices reached \$10.30, giving the narrow price range of \$1.40 per hundred-weight for the year. In early December some fat yearlings brought \$14.35 due to the Christmas trade.

Receipts were abnormally heavy during the first six months of 1926 in comparison with previous years. The lowest weekly receipts were recorded in April, with 145,000 head received at the seven most important markets. In October, when the movement of grass cattle was at its peak, a total of 349,000 head were received in the first week.

Conditions of the cattle market point to better prices for fed cattle in 1927. Thin stuff and unfinished lots also should meet with better demand than during the past year, the Foundation declares.

Effort of Education

Criminals are said to be better educated than formerly. Thus, every day, in every way, the world gets better and better.—New York Evening Post.

In the Same Class

A pedestrian who disputes right of way with an automobile is taking about the same chances as a driver who claims precedence over a train at a grade crossing.

Beginning of Cricket

There are some evidences of a similar game having been played in the Fourteenth century, but it is probable that cricket was not known until some time in the Sixteenth century.

As Grandma Used to Be

When grandmother bids little Mary act like a lady she means an old-fashioned lady.—Arkansas Gazette.

Last of Gold Coins

The last one-dollar gold piece coined were the Grant Memorial coins made in 1922.

Folly of Fashion

"So great was the weight of the elaborately padded garments worn by men in England during the reign of Henry the Eighth," points out Frederick Tisdale in an article in Liberty, "that a bench was built along the house of parliament so the fainting dandies could rest their matted thighs."

Red-Faced Babies

The more one contemplates the world the better one understands why new-born babies are red in the face.—Bakersfield Californian.

Rite Discontinued

The last continual burnt offering made by the Jews in Jerusalem was probably made A. D. 71, since which time no such offering was made.

Anger and Malice

Anger is blood poured and perplexed into froth; but malice is the wisdom of our wrath.—Sir W. Davenant.

Paine's Claim to Fame

Thomas Paine was born in 1737 and died in 1809. Of his work called "Common Sense" it is said that it was "the first open assertion of American independence, and was probably the most powerful pamphlet that ever influenced a nation's history." In this sense Thomas Paine may be said to have influenced the preparation and adoption of the Declaration of Independence.

MOKENA

Miss Elsie Sievert underwent an operation for appendicitis at the Silver Cross hospital, Joliet Tuesday.

Misses Esther Hellmuth and Evelyn Hacker are ill with the mumps.

Work has been begun on the basements and foundations for the two houses which Dr. E. G. MacMahon is having built on his lots north of Mrs. Rose Moriarty's place.

Miss Wanda Hall was surprised on Sunday by a few of her girl friends coming in to help her celebrate her thirteenth birthday. Games were played and lunch was served by her mother.

Miss Loretta McGee of Chicago spent a few days with her sister, Mrs. John Horrace.

Mr. and Mrs. Chas. Lauffer and son were entertained Sunday at the Barney Hostert home.

Don't forget the play "Davy Crockett" to be presented at the St. Mary hall Saturday night for the benefit of the school library and athletic club fund.

The well known Don C. Hall players of Mokena will present the play Wednesday evening, April 20th. Miss Viola Hall was pleasantly surprised by a group of girls at the home of Mrs. Wm. Lathrop, in honor of her birthday. She was presented with a leather Bible which was a thing that she had greatly desired to own. An enjoyable evening was spent by all and a dainty lunch was served by Mrs. Lathrop.

The congregation of the St. John Evangelical church is considering the erection of a modern seven room parsonage. The six church trustees and Mrs. E. P. Krapp, Mrs. Rose Moriarty and Mrs. Andrew Cappel have been chosen as a committee to look after this proposition.

The village board met in their last session under the old regime on Wednesday night. After disposing of some routine business the old board adjourned. Mayor Geo. J. Hacker, who was re-elected and the new trustees took their oaths of office and entered upon their new official duties.

Daylight Saving time has made a change in some of the Rock Island trains which were not effected by the change last year. The trains so effected are the morning west bound train from Chicago formerly due at 8:22 a. m., now comes at 7:22 a. m. The milk train going east in the morning now comes about 15 minutes earlier than formerly. The west bound train from Chicago formerly a flag stop and due at 2:02 p. m., has been made a regular stop and is now due at 2:04 p. m. This train will also stop at New Lenox as a regular stop. All other suburban trains run an hour earlier.

The heavy rains of last week caused Hickory Creek to overflow its banks. The Story farm was partly under water for a few days. A number of cellars in the village

were flooded when the sewers could not carry off the water fast enough.

M. E. CHURCH NOTES

Glen T. Beatty, Pastor.

Preaching service at 7:00 o'clock standard time. Sunday school 10:30 a. m. standard time.

The pastor will preach on "Christian Missions in China" next Sunday evening. The subject should be of interest to many in the face of recent events in that great section of the world.

The church has received fifty new song books for the general use of the Sunday school and church services, also several new hymnals have been ordered to supplement the supply we already have. We are indebted to the Sunday School, the Ladies Aid, the Intermediates and the cast of "The Rock" for the books.

As the fine weather comes on, let us not forget our allegiance to God, and let us attend some church service every Sunday, somewhere.

A birthday party was given in honor of Viola Hall and Angeline Homerding at the home of Mrs. Tom Homerding Thursday evening. Games were played, bunco amongst them. Prizes were awarded as follows: first prize Lois Walsh and the booby prize went to Viola Hall. Refreshments were served. Among the guests present were: Frances Sorenson, Eloise Balaz, Hertha Muehl-er, Miss Evans, Fern Liess, Harold Homerding, Mr. and Mrs. Peter Homerding and son, Mr. and Mrs. Gilbert Homerding, Mr. and Mrs. James Homerding and daughter and Mr. and Mrs. Peter Wittenkeller.

Rations for Fighters

During the World war the German soldiers were supplied with tea and coffee without milk. Small rations of rum and arrack were furnished to troops in field and camp. These rations were given out in the evening to be mixed with the tea. Fifteen to twenty men received one bottle. In times of great physical exertion, the allowance of sugar was increased.

Long Names Common

Long and intricate names for Hawaiian children are not uncommon. A baby girl has been named Ka'ikapu'alahasana'apua'milikawalo'olono Juliet Nakii, the first name meaning "the flower wreath and leaves are cherished by the waters of the god Lono."

Hermits' Cells Remain

The mountains near the city of Jericho, says one who explored many of them, "are absolutely honeycombed by the cells of ancient anchorites and hermits from top to bottom." Some of these contain frescoes and inscriptions of much interest, dating back to the earliest years of the Christian era.

FRANKFORT

The Royal Neighbors of America held their social meeting Wednesday evening at the Frankfort hall.

Mr. and Mrs. John Buch and daughter Malinda, Walter, Weichbrot and William Minger attended the funeral services of a relative at Elgin last week.

Chester Pfaff has blood poisoning in his right hand.

The Frankfort Industrial Club is making preparations for holding the first dance at the pavilion in May.

Mrs. John Clark entertained the C. B. B. Club at her home Friday afternoon. Games were played and a delightful afternoon was spent, after which dainty luncheon was served by the hostess.

Mrs. Charles Pfaff, Jr., entertained the Home Improvement Club at her home Thursday afternoon.

Mrs. Wm. Kampe who has been ill the past three weeks in bed, still remains about the same.

David William Woeltje died at the home of his parents, Mr. and Mrs. August Woeltje Saturday morning, April 23rd at the age of seven months, 22 days after a lingering illness of several months. He leaves to mourn his parents, four sisters and one brother. Funeral services were held Monday afternoon at one o'clock at the home. Burial was in the Peotone Line Cemetery, Rev. G. Gerhold of the St. Peter's church of Frankfort officiated.

Mr. and Mrs. John Stauffenberg and daughters Edith and Mabel were guests at the Chas. Pfeiffer home Sunday.

Chas. Pfeiffer and son Harold and Homer Smith of McCool, Indiana, spent the week end at their homes here Sunday.

Walter Cheney is working in Chicago Heights.

Mrs. John Kampe who has been ill for sometime is improving. Miss Hilda Gerhold who has been nursing has returned home.

The old St. Peter's church school house has been moved over to the new parsonage and will be remodeled into a garage.

The Young People's Society of St. Peter's church met Friday evening in the church basement for a social evening. Games were played and lunch was served consisting of ice cream and cake.

Rev. and Mrs. Gerhold are entertaining their son, and his family of Ohio.

The Ladies Aid of St. Peter's church held their monthly "coffee" at the church basement Thursday afternoon and evening.

Mrs. Max Haass expects soon to return home from Silver Cross hospital, Joliet where she recently underwent an operation.

Mrs. Jenney Hossbach entertained the Afternoon Pinochle Club at the home of her sister, Mrs. Homer

Smith Friday afternoon. Cards were played at three tables. Prizes were awarded to Mrs. Herbert Minger and Mrs. Frank Cheney. Luncheon was served. The next meeting will be held at the home of Mrs. Charles Pfaff, Sr., May 6th at 1:45 o'clock.

The losers entertained the winning teams of the school for those who sold magazines by giving a party at the school Wednesday. Games were played and refreshments were served consisting of sandwiches, pickles, cake and ice cream.

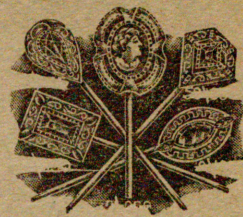

Mrs. Henry Stellwagon who has been ill with diphtheria is able to be out again.

Mrs. Reimers' daughter from Monroe is here caring for her mother who has been ill for sometime but now is improving.

Mr. and Mrs. Harold Folkers and son William Frederick spent Sunday in Manhattan with relatives.

Mr. and Mrs. Chas. Pfeiffer and daughters spent Sunday evening in Homewood at the Ed. Haake home. Henry Haake is ill.

Trade among Friends

No matter what some folks say to the contrary, there certainly is a lot of sentiment in business. Friendship, for instance, makes more satisfactory sales than all the cleverness and argument in the world.

You like to trade at a certain store—not because its counters are arranged in a scientific way, but because the folks who serve you are always friendly and helpful.

Just that very thing—FRIENDLY SERVICE—is the power that draws people together into communities like this, where everybody can enjoy the many benefits of neighborly cooperation.

And FRIENDLY SERVICE is the sentimental reason why you find it very much to your advantage to trade with our advertisers—to buy where you feel at home, where your friends will see that you are well satisfied.

Read the Ads in this Paper
and save yourself money by trading at home.

Orchard Information

UNADAPTED FRUITS CAUSE HEAVY LOSS

Thousands of dollars are being spent annually in attempts to make fruit trees bear which are unprofitable simply because a given variety is not at home in the particular section where it was planted, according to W. S. Borch, of the pomology division, college of agriculture, University of Illinois. Most of the time and money thus spent is wasted, thus giving at least one incentive to choose varieties carefully, using as a basis the experiments and observations of reliable agencies such as the colleges and the experiment stations, he said.

"The variety is the key to successful fruit growing, but varieties of fruit vary widely in adaptability, both to soil and climate. A variety may thrive on some of the fertile, well-drained soils of western Illinois, but refuse to bear profitable crops when planted on other types of soil in the same latitude. Still other varieties are quite tolerant of poor soil conditions, but need such a long season for proper development that they can be grown only in the South.

"For horticultural purposes, Illinois, for instance, may be taken as consisting of three districts each comprising roughly one-third of the latitude covered by the state. Varieties adapted to each district have been tabulated and such variety lists are available for free distribution to residents of the state who request them of the experiment station of the college of agriculture.

"In addition to adaptability, choice of variety depends upon the use for which a fruit plantation is to be planted. A home orchard may consist of many varieties, the ripening season of which should extend from the earliest to the latest. A commercial orchard should have few varieties in order that a large volume of fruit is ready at one time to facilitate economical marketing. Thus a farm apple orchard might contain 20 varieties with only 30 trees, while a commercial orchard of 1,500 trees should have not more than 5 varieties.

"A peach orchard for home use would be incomplete with less than a dozen trees, but a commercial peach orchard of 100 acres will in most cases contain but two varieties.

"The variety question is a local one and no orchard should be planted without considering all of the above questions in addition to securing such information as may be obtained by visiting fruit plantations in the neighborhood."

Peach Growers Advised to Get Rid of Poor Ones

New Jersey peach growers should now be convinced that our old commercial varieties of peaches, with one or two exceptions, no longer meet the present-day requirements for either growers or consumers, yet there are still large numbers of trees of such varieties as Carmen, Hiley, and Belle, points out a recent issue of the New Jersey Horticultural Society News.

To quote: "Some of these are young trees in full vigor, while others are old and on the decline. Get rid of the latter as soon as possible.

"New varieties equal to Hale in appearance are in sight. You will want to plant some of them as soon as trees are available. Be ready to give them a fair start.

"The site of an old orchard should be put in shape for a new planting by liberal fertilization and the growing of a crop that will return a large quantity of organic matter to the soil. If an old orchard site can be devoted to other crops for several years, so much the better. Clear the land that is in old, unprofitable varieties of peaches and get ready for better days."

Grafting Pears Is Not Highly Recommended

The pear will grow on the quince and mountain ash as well as on itself and upon the hawthorn. Yet it is dwarfed by being grafted upon anything but the pear, and becomes more a novelty than a practical orchard plant. Grafting can be done in early spring just before growth starts, using the common cleft graft. The orchardist will be more successful, however, if a tongue-graft is made during the dormant season, using a piece of hawthorn root about the size of a pencil and a corresponding length of scion wood from the pear. If one enjoys playing with a thing of this kind, go ahead and try it. If, on the other hand, a man is looking for pears, he will do better by purchasing his pear trees from some reliable nursery concern.

Protection for Trees

To protect fruit trees from rabbits, take one gallon of ordinary house paint, add one teaspoonful of sulphur well stirred in. Dig away two inches of dirt from the base of the tree and let dry for two hours. Apply the mixture with a paint brush. This is a cheap and sure way and will last for two years. Paint two or three feet, or up to the forks, for jackrabbits stand on their hind feet and gnaw as high as they can reach. One man can point 100 trees per day.

Increase Potato Yield Per Acre

Farmers Do Not Make Efficient Use of Knowledge in Growing Spuds.

(Prepared by the United States Department of Agriculture.)

Last fall a firm of California's potato growers harvested an average of 1,000 bushels of potatoes per acre from nine acres. The rest of the country, if previous production records are a reliable index, harvested approximately 113 bushels to the acre. Farmers in Great Britain have been producing an average of 200 bushels per acre for a number of years. It is evident, says William Stuart, potato specialist of the United States Department of Agriculture, that the general run of farmers who grow potatoes in the United States do not make efficient use of the available knowledge on increasing acre production.

Cause of Low Yield.

Of the many factors causing a low average potato yield in this country, poor seed is one of the most important, says Mr. Stuart. The American potato grower, generally speaking, pays too little attention to the quality and quantity of the seed used. The California record was due in part to the use of 40 bushels of seed per acre, almost twice the quantity generally used even by the most progressive growers.

Perhaps the best way for the average grower to be assured of good seed is to purchase "certified seed." Certified seed is being produced by groups of growers in twenty or more states, who give special attention to the production of seed that will pass state inspection as to yielding ability, uniformity, truthness to name, and freedom from disease.

Improved Seed.

There is abundant evidence that certified seed is improved seed, and that it will yield much more than common or "grocery store" seed. For instance, the average yield in Michigan last year was 122 bushels per acre, while the average production from certified seed was 256 bushels per acre. This represents a gain of 134 bushels on each acre planted with certified seed. In comparative tests made last year by the Tennessee state experiment station certified seed produced an average of 183 bushels to the acre, while the yield from uncertified seed was but 102 bushels per acre.

Soy Beans One of Easy Crops to Grow on Farm

Soy beans will grow on all kinds of soils. Soy bean hay is more nutritious than cowpea hay and stock like it better. As a milk-and-butter producer, they are equal to alfalfa and superior to cottonseed meal. A bushel of soy beans is worth more for feed than two bushels of corn. They can be hogged down without any harvesting expense. When cut at the proper stage of growth, the hay is equal to alfalfa for dairy cattle. Drought and excessive rainfall effect them less than cowpeas.

It is one of the easiest crops to grow and harvest. They make a fine hay pasture. They can be grown with cowpeas to hold the pea vines off the ground, and will improve the quality of the hay and make it easier to cure. They increase the yield of the following crop. They make a rich and nutritious hay and one of the cheapest. One can always find ready sale for both beans and hay. They are one of the most economical of soil improvers. They require no fertilizers except acid phosphate. Plant more soy beans.

In Spring Cut Out and Bury Raspberry Canes

The way black raspberries propagate is this: Late in the season, September and October, some of the new shoots bend over until they touch the ground and the tips take root, forming new plants.

These may be left where they grew until the following spring, when the parent cane is cut off just a few inches above the new plant and you have a new stock of plants. The old fruiting plants never sucker, but a sufficient number of new shoots, later called canes, come up each year to form a new bush.

As soon as the berry season is over or the following spring, cut out and burn all canes which have borne fruit. These are all through, will never bear again and if not removed will stand as dead brush. Many growers leave them until spring to help hold up the new canes during heavy snow, ice or wind storms. Not a bad idea. There is not much more to be said.

Agricultural Facts

Bugs and fungi wait for no man.

Legumes and lime are the gold dust twins of agriculture.

The best sort of "farm relief" comes from intelligence, energy, and thrift.

Regardless of the statements of overenthusiastic dealers seed treatment will not control corn smut.

Farming is hard work, but the biggest waste in farming is the waste of time in an unbalanced farming plan.

STATE CAPITOL NEWS

Representative David H. McClugage, who is author of House Bill 100, providing for perpetual registration of voters, has agreed to withdraw his bill and support in general Senator John T. Joyce's bill, Senate Bill 220, providing for general registration every four years instead of every two years as at present. This bill has the approval of the state-wide organization recently formed of representatives of election commissions. This report further offered a recommendation for central registration the year round, as well as the following: The appointment of a commission of five to study the election laws in their entirety and, co-operating with the election commissions throughout the state, to prepare new and comprehensive legislation which will correct present confusion. Increase of the compensation of judges and clerks two dollars per diem, or from six to eight dollars, with double compensation at Presidential primaries and elections. Making hours of primaries and elections conform, with the polls open from 6 a. m. to 4 p. m. At present the polls are open for the primary from 6 to 5, but for election from 6 to 4.

The senate committee on agriculture voted out with favorable recommendations Senator Harold Kessinger's bill regulating boards of trade. A. C. Everingham, representing the Illinois Agricultural association, supported the measure and urged favorable action. An amendment to create a public exchange commission which would have charge of enforcement of the provisions of the bill was added. Senator A. S. Cuthbertson, Bunker Hill, offered the amendment, giving the power of enforcement to a commission of three persons, instead of investing full power in the department of agriculture.

The State department of conservation has announced that there remain but 3,000,000 of the original 15,000,000 acres of farm woodland in the state. It is this fact that actuated the drive made by the department during National Forest Week. A leading feature of this drive was the giving of illustrated lectures in regard to tree conservation by three members of the department before school throughout the state.

The house of representatives killed Representative R. G. Soderstrom's Old Age Pension bill. The measure provided a half mill tax levy for the purpose of creating a pension fund for persons over seventy years old whose financial condition justified such aid. The amount of the pension was fixed at \$200 per year, and the measure was intended as a means of permitting aged persons to maintain themselves if they so desired, instead of entering an institution.

Justice Clyde E. Stone is the Republican nominee for re-election as chief justice from the Fifth district. Speaker Robert Scholes contested his nomination. A part of the delegates to the nominating convention in the Fifth district in March withdrew and nominated Speaker Scholes and a certificate of nomination was filed with Secretary of State Louis L. Emerson. However, the certificate of nomination of Chief Justice Stone was filed first. Speaker Scholes addressed the secretary of state and the ten county judges asking that they consider his objections to the nomination of Stone. Attorney General Carlstrom ruled that section ten of the Australian ballot act, under which Scholes asked that the matter be reviewed, was unconstitutional and void and that it developed upon Secretary Emerson as the filing officer to pass upon the regularity of the nominations. Secretary Emerson declared that he could find no statute authorizing him to summon witnesses and hear evidence, and that the extent of his jurisdiction was simply what appeared on the face of the nominating certificate. Chief Justice Stone's certificate was filed first and appeared regular in every way. He suggested that Speaker Scholes get the opinion of the Supreme court while that body was in session. Scholes' attorneys then filed a petition for a writ of mandamus compelling the secretary to refer the contest to the ten county judges, but the court refused the writ and upheld the opinion of the attorney general that section 10 of the ballot act is "so vague and uncertain in its terms, so incomplete and defective in its provisions, so lacking in the means of its enforcement and the power attempted to be given to said board is so arbitrary and unlimited, that the rights of the contestants and the rights of the public in such contest cannot be protected, and it is therefore void."

Justice Clyde E. Stone is the Republican nominee for re-election as chief justice from the Fifth district. Speaker Robert Scholes contested his nomination. A part of the delegates to the nominating convention in the Fifth district in March withdrew and nominated Speaker Scholes and a certificate of nomination was filed with Secretary of State Louis L. Emerson. However, the certificate of nomination of Chief Justice Stone was filed first. Speaker Scholes addressed the secretary of state and the ten county judges asking that they consider his objections to the nomination of Stone. Attorney General Carlstrom ruled that section ten of the Australian ballot act, under which Scholes asked that the matter be reviewed, was unconstitutional and void and that it developed upon Secretary Emerson as the filing officer to pass upon the regularity of the nominations. Secretary Emerson declared that he could find no statute authorizing him to summon witnesses and hear evidence, and that the extent of his jurisdiction was simply what appeared on the face of the nominating certificate. Clean-up week, so designated in a proclamation issued by Governor Small, has met with state-wide approval and promises to be one of the most extensive drives for the promotion of public health and civic cleanliness ever carried on. Co-operation of city and rural schools, boy scouts organizations and various civic organizations was secured and did much to promote the success which the movement met. "Clean-up week" will probably become an annual affair.

Governor Small issued a proclamation designating the American Red Cross as the official agency in the State of Illinois for the distribution of contributions made for the relief of the flood victims in the southern part of the state, and asked that all contributions of food, clothing and money be sent to that organization's midwestern division at St. Louis. He urged that all communities and other agencies undertaking relief work co-operate with the Red Cross.

Although there are 288 cases of scarlet fever reported, an increase of seven cases over the previous report, and cases of mumps have jumped from 508 to 601. Dr. I. D. Rawlings, director of the State Department of Public Health, in his latest report indicated that there is a decrease in the total of cases of all contagious disease in the state. Cases of pneumonia in the downstate remain at 304 over the two week period, but the report shows an increase in Chicago from 152 as of the previous week to 225.

Senator Andrew S. Cuthbertson introduced a resolution in the senate calling for an appropriation of \$50,000 for the temporary relief of tornado sufferers in Illinois.

Bids received by the division of highways from 17 leading Portland cement companies in the Midwest on 3,000,000 barrels of cement revealed that the price is approximately 5 per cent less than in 1925.

Senator Earl B. Searcy offered a resolution memorializing the secretary of the navy and other government officials to restore the frigate Constitution and send it on a voyage of the Great Lakes.

Eight counties will be benefited by bridges and roads to be constructed under contracts totaling \$348,147.13 recently let by the department of public works and buildings. Following are the counties: Clinton, Tazewell, Whiteside, Hancock, White, Randolph, Perry and St. Clair. The work includes six bridges and four stretches of concrete road.

Although the April term of the state Supreme court came to an end without a decision being handed down in the Lee county case involving the validity of the state primary election law, the legislature will probably pass another law to meet objections which are included in the test case. This is a safeguard to the 1928 primaries. If the Supreme court should rule out the present primary law at the June term, it would be almost impossible to pass another act after that time to take care of the candidates for governor and other state offices.

According to a statement issued by S. J. Stanard, director of agriculture of Illinois, commenting upon a report made to him by A. J. Surratt, agricultural statistician, "The Illinois cow, always a dependable source of income, 'came through' with \$101,563,830.00 last year. It took more than four and a half billion pounds of milk to produce this revenue," Stanard continued, "as the average price per 100 pounds was \$2.23. Going into these figures, we find that this hundred-million-dollar pay check was big enough to pay off almost half the mortgaged debt that rested on the farms of Illinois in 1925. The average farm home received from the sale of milk and milk products during the year \$450, or approximately around \$100 for every person living on the farms in Illinois."

The Supreme court reversed judgment and remanded for retrial the case of Mrs. Elsie Sweetin, who is serving a 35-year sentence at Joliet for the murder of her husband. She was convicted in the Circuit court of Jefferson county, along with Rev. Lawrence Hight, serving life sentence at Chester. The Supreme court found reversible error and said that she should have been given separate trial as requested by her attorneys.

Representative David McClugage's bill providing for home rule of public utilities has been referred by the house committee on utilities to a subcommittee of nine members. This practically precludes any action on it during this session of the general assembly. Former Attorney General Patrick J. Lucey, Chicago, talked against the measure at the committee hearing, and maintained that it would hinder the electric light and power companies in their efforts to extend their service to the farmers of the state. He pointed out that in states where this effort has been most successful the utilities are regulated by state commissions and operate under terminable permits.

Clean-up week, so designated in a proclamation issued by Governor Small, has met with state-wide approval and promises to be one of the most extensive drives for the promotion of public health and civic cleanliness ever carried on. Co-operation of city and rural schools, boy scouts organizations and various civic organizations was secured and did much to promote the success which the movement met. "Clean-up week" will probably become an annual affair.

Governor Small issued a proclamation designating the American Red Cross as the official agency in the State of Illinois for the distribution of contributions made for the relief of the flood victims in the southern part of the state, and asked that all contributions of food, clothing and money be sent to that organization's midwestern division at St. Louis. He urged that all communities and other agencies undertaking relief work co-operate with the Red Cross.

Cases of pneumonia in the downstate remain at 304 over the two week period, but the report shows an increase in Chicago from 152 as of the previous week to 225.

THE KITCHEN CABINET

(© 1927 Western Newspaper Union.)

To set the face in the right direction, and then simply to travel on, unmindful and never discouraged by even frequent relapses by the way, is the secret of human achievement.

FOOD, ITS FUNCTIONS

No housekeeper who reads the current magazines should be ignorant in regard to the importance of food study. To know why her child is not thriving and to remedy it with properly balanced food is something every mother should learn.

There are a few general principles which if learned and borne in mind when supplying the food for the family will feed them correctly. First in importance is the point that all families differ more or less as to needs.

The outdoor worker who is doing hard labor can eat, digest and thrive on foods that would be injurious to an indoor worker. The growing child who is active will consume and care for as much food as the average man, because he is building a framework and covering it with good healthy muscles. Food supplies the body with what it needs for growth and energy.

There are certain elements which are essential to support life; many of them are found in small quantities in the body. When any one of these is lacking the health begins to break. These elements are carbon, oxygen, nitrogen, sulphur, phosphorus, iron, calcium, potassium, sodium, iodine and several others of smaller amounts. The foodstuffs which furnish these elements are:

Proteins which yield carbon, hydrogen, oxygen, sulphur and sometimes iron and phosphorus.

Fats are found in meat, butter, cream, vegetable oils, yolks of egg and nuts.

Mineral matter is found in water, fruits, green vegetables, meat, milk, whole wheat and other grains, and egg yolk.

Carbohydrates are found in rice, other cereals, potatoes, other starchy vegetables, fruit, honey and sugar.

The fats which yield carbon, hydrogen and oxygen—these are the heat producing. In cold weather we need more of such food to keep up the body heat.

If one is fortunate enough to live near where water cress grows, a supply of most wholesome greens will always be available. Serve with lamb chops, just as a garnish, but eat the garnish. When eaten with just a bit of salt its peculiar piquancy is most apparent.

Radishes cut to simulate tulips make a pretty garnishment. Cut into thin slices and arranged in overlapping rows with slices of tender green onion they may serve as garnish or as a salad with shredded cabbage or lettuce.

Easy Luncheon Dishes.

With a cookie jar always replenished and a dish of fruit with a hot drink, one need never worry about an appropriate dessert. For something different try:

Jelly Fluff.—Take the white of one egg, unbeaten and one-half of a glass of jelly, beat until the mixture stands up well. Heap in sherbet cups and top with whipped cream.

Caramel Cornstarch Pudding.—Brown one-half cupful of sugar in a smooth frying pan, then add a pint of boiling milk; stir until the caramel is well dissolved then add two table spoonfuls of cornstarch well mixed with a little cold milk. Boil until the starchy taste is gone. Pour into sherbet cups and chill. Serve with a spoonful of whipped cream on the top of each.

Snowballs.—Spread cooked rice over squares of muslin wet with cold water. In the center place a canned pear, peach or apricot. Tie carefully and steam ten minutes. Remove the cloth and serve with a sauce made from the fruit juice.

Beef Collaps.—Put a tablespoonful of butter in a frying pan; add one small onion chopped fine, a teaspoonful of minced parsley, the same of salt, and a few dashes of pepper. Stir in one tablespoonful of flour and add one pound of raw beef cut fine. Cook five minutes, stirring constantly. Serve hot on buttered toast.

Mock Terrapin.—Cut cooked calf's liver into dice. Put a tablespoonful of butter into a saucepan, add salt and pepper with a dash of paprika, and cook until the butter is slightly brown; add two tablespoonfuls of flour and enough beef stock to make a moderately thick sauce. Use beef extract and water for the stock if needed. Add a little chopped parsley, one-half cupful of cream, two hard-cooked eggs cut fine, a tablespoonful of lemon juice and the liver. Cook until the liver is heated through, add two tablespoonfuls of jelly or any canned fruit juice and serve at once on buttered toast.

Nellie Maxwell

"Little Jack Horner sat in a corner, Eating a Christmas pie, but we'll have delicious Monarch Cocoa and Teenie Weenie Peanut Butter sandwiches."

Every genuine Monarch package bears the Lion Head, the oldest trademark in the United States covering a complete line of the world's finest food products—Coffee, Tea, Cocoa, Catsup, Pickles, Peanut Butter, Canned Fruits and Vegetables, and other superior table specialties.

MONARCH Quality for 70 Years

Monarch is the only nationally advertised brand of QUALITY FOOD PRODUCTS sold exclusively through the man who owns and operates their own stores.

Freaks in Currency

The United States treasury has some startling examples of "inflated" and "deflated" currency. In the redemption division is one bill which was "deflated" to nearly half its regular size when accidentally dropped into lye. Another was "inflated" about 50 per cent—in size—when it passed through heavy rollers in a mill.

Shiftiness is the reason so many plans for thrift fail.

INSTALL CHAMPIONS NOW

Once again Champion reminds you that to enjoy maximum engine performance during the next twelve months you should install a complete new set of spark plugs now.

Champion is the better spark plug because of its double-ribbed, all-metal core—its two-piece construction and its special analysis electrodes.

Garibaldi

A STOCKY, bearded man was arrested on a charge of so-called treason. He was Giuseppe Garibaldi, son of a poor Italian fisherman, and himself a sailor by occupation. In 1834, when only twenty-seven, he joined the "Young Italy" society, was implicated in a plot to free his country from the Austrian yoke, and was condemned to death.

"This ends your career, my friend," remarked one consulatory jailor.

"You are mistaken," retorted Garibaldi, coolly. "My destiny is not fulfilled. Italy's not yet free. I shall live."

He made good his words by escaping from prison. He found his way to South America, where he plunged at once into the warfare that convulsed that continent, and repeatedly won fame by his efforts in behalf of the weaker side. He was taken prisoner by the Brazilian government, escaped, eloped with a beautiful Creole, successively picked up a living as cattleman, ship broker and teacher of mathematics, organized an Italian legion and served as naval commander for Montevideo in the latter's war with Buenos Ayres. Then he returned to Italy and, raising a body of irregular troops, again harried the Austrians.

Italy was divided into a number of independent and semi-independent principalities, including a group of states under the direct temporal rule of the pope. But the northern part of the country was in Austria's hands, while nearly all of it was more or less under Austrian domination. Austria bullied and oppressed the hapless land cruelly. As a result, Mazzini and other patriots formed a horde of secret societies with the hope of freeing their downtrodden fatherland and joining its separate states into one strong union. In 1830, 1834 and at other times revolts sprang up, only to be crushed with an iron hand.

The Carbonari, "Young Italy" and similar patriotic leagues continued their efforts, and in 1848 Garibaldi and his fellow revolutionists captured Rome, forcing the pope to fly to Gaeta. They formed a republic in which Garibaldi and Mazzini were supreme. But Napoleon III (who had earlier pledged his support to the revolutionists) sent a French army to the pope's aid. Garibaldi gallantly held Rome against the stronger foe for thirty days, but was at last forced to evacuate the city. Again Garibaldi was forced to flee from Italy. He now came to New York, where he remained for over a year, working as a candle maker and living on Staten Island. Later he was captain of a Pacific merchantman.

In 1854 he returned to Italy and bought a farm on the island of Capri, off the Sardinian coast. But he was not allowed to remain long in seclusion.

Charles Albert, king of Sardinia, had striven to shake off the Austrian yoke, but was beaten, 1849, at Novara. Heartbroken, he abdicated on the field of battle in favor of his son, Victor Emmanuel, duke of Savoy (grandfather of the present king of Italy), a man of simple tastes, who preferred mountaineering and hunting to the pomp of state. Italy was now at lowest ebb. But for Victor Emmanuel and Garibaldi it might still be in semi-slavery to foreign power. But in 1859 Victor Emmanuel, refusing Austria's command to disarm his little kingdom, made an alliance with Napoleon III. Together with Solferino, Magenta and elsewhere they inflicted terrific defeats on Austria, and won the war, the great province of Lombardy being ceded to Sardinia, while Victor Emmanuel, in payment, turned over his own ancestral duchy of Savoy to France. The tide had turned. Other principalities—Bologna, Tuscany, Parma, Modena and Romagna (the last named being one of the "papal states")—annexed themselves to Sardinia. The pope promptly excommunicated everyone concerned in the reform.

Garibaldi left his seclusion and, with 1,000 "red-shirt men," invaded Sicily. In less than three months he had freed the island. He was acclaimed a hero on his return to Italy, but refused all gifts and honors and went quietly back to his farm. The freeing of Sicily and lower Italy by Garibaldi caused the fall of the king of Naples, an oppressor and foe to liberty and lopped off more papal provinces. Thus by 1861 all Italy, with the exception of Venetia and the few remaining papal provinces, was a united kingdom under Victor Emmanuel's rule.

In 1866, when Prussia and Italy fought Austria, Venetia was ceded to Italy; and in 1870, when the Franco-Prussian war caused the withdrawal of French troops from Rome, Victor Emmanuel annexed the last of the papal states, guaranteeing spiritual independence to the pope and himself becoming first king of the free and united Italy.

Garibaldi, meantime, had won fresh fame by invading the Tyrol in the war of 1866, and had fought gallantly in the Franco-Prussian war. Still declining the office, ranks and honors tendered him, he returned to his island farm, where, crippled and broken in health, he died in 1882.

This man of the people was the central and most picturesque figure in the long struggle for Italian liberty, and was also the Nineteenth century's highest type of disinterested patriot.

Baron Tanaka, head of the Seiyukai party, has been appointed premier of Japan to succeed Wakasuki, who resigned. Baron Tanaka, who has been minister of war in three cabinets, was born in 1863, the son of a humble servant of the feudal Lord Mori.

Funeral for Snake

Some time ago a rattlesnake was captured in the Blue Ridge foothills by wood haulers. The reptile became domesticated and docile in his tame surroundings. He was called "Lucky Jake" and became the favorite pet of workers at the Deford tannery in Virginia. Recently during a severe cold spell Lucky Jake died, probably from old age. The whole tannery force turned out for his brief but well-attended funeral services.

Natural Steam Employed

Natural steam rising from geysers has been employed in Japan to turn wheels which generated electricity which was eventually used for lighting purposes. In Sonoma county, California, natural steam rising from hot springs has been used for heating purposes in dwellings and other buildings.

All Set

"When are we to have our dance?"
"Oh, in about another hour."
"I'll be gone by then."
"That won't matter. So shall I."—

Special Offer to Victims of Indigestion

Your Druggist Says Pleasant to Take, Elixir Must Help Poor Distressed Stomachs or Money Gladly Refunded.

You can be so distressed with gas and fullness from poor digestion or dyspepsia that you think your heart is going to stop beating.

Your stomach may be so distended that your breathing is short and gaspy. You are dizzy and pray for quick relief—what's to be done.

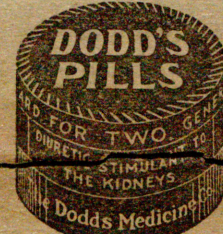

Just one tablespoonful of Dare's Mentha Pepsin and speedily the gas disappears, the pressing on the heart ceases and you can breathe deep and naturally.

Oh! What blessed relief; but why not get rid of such attacks altogether? Why have them at all?

Especially when any druggist anywhere guarantees Dare's Mentha Pepsin, a pleasant elixir, to help you or money back.

Sacred Bowl Found in Pueblo

Discovery of a sacred bowl, representing an antelope, has been made in the ruins of Elden pueblo, near Flagstaff, Ariz., by the Smithsonian Institution, says the Dearborn Independent.

DIURETIC STIMULANT TO THE KIDNEYS

Mrs. A. L. Crawford, Medford, Mass., writes: "When the doctors pronounced my case Bright's Disease, I was in such a serious condition that they could not do anything for me. I kept getting worse. My limbs from my ankles to my knees swelled and my eyes were so swollen that I couldn't see. As a last hope I thought I would give Dodd's Pills a trial. I gradually improved and kept on taking them. I was greatly benefited."

Buy a box today, 60 cents at your drug store or the Dodd's Medicine Co., 700 Main St., Buffalo, N. Y.

TWO HOMES MADE HAPPY

By Women Who Used Lydia E. Pinkham's Vegetable Compound.

"I have taken Lydia E. Pinkham's Vegetable Compound and I think it is the most wonderful medicine I ever tried." is the statement made by Mrs. Goldie Shoup of St. Joseph, Illinois. She declares that after taking the Compound she is in better health than before.

Mrs. J. Storms of 29 Lane Street, Paterson, N. J., writes: "I cannot speak too highly of your medicine and I recommend it to all my friends."

These statements were taken from two enthusiastic letters which tell of the help that has been received from using the Vegetable Compound. Both Mrs. Shoup and Mrs. Storms were in a run-down condition which caused them much unhappiness. When women are suffering from lack of strength and from weakness, their own life and that of their family is affected. When they feel well and strong and are able to do their household easily, happy homes are the result.

Are you on the Sunlit Road to Better Health?

Keep Stomach and Bowels Right
By giving baby the harmless, purely vegetable, infant's stomach regulator, **MRS. WINSLOW'S SYRUP** brings astonishing, gratifying results in making baby's stomach digest food and bowels move as they should at teething time. Mother of 3 Children Tells Experience

Effects of "Flu," Nervousness, Indigestion, Biliousness, Conquered by Tanlac. Good Health Restored

Mrs. Mary Barnett, Route 3, Niot, Ill., mother of 3 wonderful children, says: "After years of pain, worry and despair, I regained good health, strength and energy—Thanks to Tanlac."

"Imagine being unable to eat the lightest food without suffering afterwards! Constipation wore me down to a shadow. I became almost a nervous wreck and felt miserable all over. Still I dragged through the days, getting thinner and weaker, and at last was on the verge of a complete breakdown."

"A friend of mine suggested Tanlac. I tried it. Results amazed me. I soon began to sleep naturally and enjoy eating."

"Tanalac really made a new woman of me. I feel just fine now, as you can see from my healthy appearance. I urge every sickly person to take this tonic."

Tanalac is Nature's own remedy

made from roots, barks and herbs, according to the Tanlac formula.

Why neglect your health? Why suffer needlessly? Begin taking this wonder tonic now. Ask your druggist for Tanlac—today! Over 40 million bottles sold.

Police Chief Aug. Hentsch Resigns

August Hentsch who has been serving Mokena as police chief since John Frisch quit several months, turned in his resignation at the board meeting Wednesday night. In handing in his resignation Mr. Hentsch stated that he is working for the government as a mail messenger he is not allowed to hold any appointive or elective office, and especially not a police job. No successor has been appointed. In the meantime each alderman is invested with police power and can act as a police officer.

Peter H. Lorenzen Claimed by Death

Peter H. Lorenzen, aged 77 years died at the home of his daughter, Mrs. Herman Schweser, Friday, April 15th following a lingering illness. The deceased was born Oct. 22, 1849 on the Isle of Sylt, near Germany. At the age of 16 years he came to America and settled near Frankfort. On May 29, 1876 he was united in marriage with Amalia Guritz of Green Garden. They located on a farm in Green Garden and resided there until 9 years ago when they retired and moved to Frankfort. He came to the home of his daughter, Mrs. Schweser in December and remained there to the time of his death.

The deceased is survived by his widow, six sons Lorenz, Frankfort; Wm. Mokena; Andrew, California; Alfred, Blue Island; Paul, Las Anamas, Colo; Peter A. Grand Rapids, Michigan; five daughters, Henrietta Schweser; Hannah Johnson, Lindsburg, Kans; Christina Abrahamson, Macksville, Kans; Helen Sims, Holly, Colo; and Carolina Lauritzen, South Chicago; 26 grandchildren and one sister in Germany. Funeral services were held Monday afternoon at St. Peter's Evangelical church, Frankfort. Burial in Pleasant Hill cemetery. Rev. Mr. Gerhold officiated.

MOKENA

Miss Vera Kohlhaugen, daughter of Mr. and Mrs. Harry Kohlhaugen and Jacob Barenz, son of Mrs. Mary Barenz, were united in marriage at the home of the bride's parents, last Saturday afternoon at 2 o'clock the Rev. Wm. Kreis of Dolan, officiating.

Dr. Mc Mahon underwent an operation at Silver Cross hospital Thursday.

The Plus Ultra Sunday school of the M. E. church were entertained last Friday evening in the home of Miss Almira Koeller.

The Willing Helpers M. E. Sunday school class will meet this Saturday afternoon with Alice Lauffer.

CARD OF THANKS

We wish to extend our appreciations to all friends and relatives for their kindness shown us in the death of our brother, Herman Geiger, also for the beautiful floral offerings.

The Kunison Family.

IN MEMORIAM

In loving memory of our dear husband and father, John Oestreich, who passed away two years ago May first.

"This memory is as a sacred balm, to soothe our aching hearts."

Loving wife and children.

Peter Michelsen expects to open his ice cream parlor soon. He has also erected an oil service station and will open same shortly. In all Mr. Michelsen has made quite a decided improvement to the south side of Mokena. Good work, Pete, keep it up.

Holes in Cheese

The bureau of dairying does not believe that there is any cheese in which the holes are made by worms. Most cheese in which holes are found is made in such a way as to develop gas which produces a specific organism which causes holes.

Two Old Academies

Phillips Exeter Academy was founded by John Phillips at Exeter in 1781 and became known as Phillips Exeter to distinguish it from Phillips Andover, which was founded in 1778 through the gifts of the Phillips family.

Milk Gives Most Food Value At Least Cost

Milk gives more food value for less cost than any other food known to man, according to Herbert C. Hooks, secretary of the Evaporated Milk association. "Dietitians are unanimous in advocating the use of milk by men, women and children," said Mr. Hooks. "Milk and evaporated milk supply some of all the materials necessary for the growth and maintenance of the body; they furnish energy for work, play and warmth. 'Milk helps repair the wear and tear of the body. It is as good as meat for building muscle. Moreover, it is cheaper. A quart of milk will supply as much protein as seven ounces of sirloin steak or four large eggs. Milk, particularly evaporated milk, which has twice the mineral content of market milk, is one of the best and cheapest sources of lime, which is a form of calcium. Infants and growing children need lime to build bones and teeth. It is just as necessary for adults to keep their bones in good condition. One quart of milk, or one pint of evaporated milk, furnishes as much calcium as ten large oranges, thirty-two eggs or twenty pounds of beef. Milk also is a valuable source of phosphorus and supplies a certain amount of iron."

"By some authorities milk is said to be an aid in longevity. Dr. Herman Bundesen, health commissioner for Chicago, gives his prescription for long life as follows: Drink one quart of milk a day and mix with one hour of sunshine. Repeat ad infinitum. "Due to the efforts of health officials to get across to the public the message of milk, its general use in the United States has advanced tremendously in the last decade. This is especially true of evaporated milk for reasons of its convenience and economy. Housewives know there is no fear of obtaining contaminated evaporated milk, because it is not only the best grade of market milk rendered double-cream by dehydrating, but it is sterilized as well."

Hey There!

How about your letterheads, billheads, statements, envelopes, cards, etc. Don't wait until they are all gone and then ask us to rush them out in a hurry for you. Good work requires time and our motto is that anything that's worth doing is worth doing well.

And every real business man will invest money when he knows that a substantial profit can be realized on every dollar invested.

Any Successful Business Man Can Tell You That You Have Got To Back Your Business With Advertising.

NOTICE
TONIGHT AT 8:45
IN TOWN HALL

BAD WEATHER HURT OATS CROP

DUE to bad weather and rain there is apt to be a scarcity of high-grade oats, upon which the oatmeal manufacturers depend for their product but there probably will be plenty of oatmeal for everybody, according to the Sears-Roebuck Agricultural Foundation in its review of the oats situation for 1928.

A total crop of only 1,253,739,000 bushels, averaging 78.9 per cent in quality was the 1928 record as compared with a production of 1,487,550,000 bushels in 1925, which averaged 91.7 per cent in quality. The five-year average is 1,317,915,000 bushels and the ten-year average quality has been 88.8. The harvest of 1926 covered 44,394,000 acres, as compared with 44,872,000 acres last year and an

average acreage of 43,849,000 for the past five years. The yield in 1926 was 28.2 bushels per acre against 33.2 bushels in 1925.

From the first of the year prices gradually worked down to 33½ cents recorded at Chicago in August, but an advance followed which carried prices up to 47½ cents late in October. Relatively low prices prevailed from January to September, after which they got to higher levels. Receipts from the 1928 crop have been light, but there is still a large visible carryover from the 1925 crop. In July weekly receipts at the 14 primary markets declined to 1,500,000 bushels. In September the weekly receipts at the same markets reached 8,000,000 bushels.

TINLEY PARK

Rev. Jochum confirmed a class of seven children at the German M. E. church on Easter. Those in the class were: Sylvia Andres, Ruth Andres, Mabel Bettenhausen, Russel Bettenhausen, Alvin Andres, Harold Andres, Albert Brandau.

It is interesting to observe what a multi-millionaire considers to be really worth while. Some time ago, Mr. Henry Ford told an interviewer some things which reveal the "inner" life of this millionaire and throws light upon some vital things which apparently his money cannot give him.

At the Orland Park M. E. church next Sunday evening the pastor will give the result of this famous interview with Mr. Ford and also draw some practical implications for our lives from the same.

The service is at 7 p. m. standard time or 8 p. m. Daylight saving time. Everyone welcome.

Mr. and Mrs. Earl Bloom of Chicago Heights are the proud parents of a baby boy born April 18th.

The Delta Sigma Phi of Chicago of which Mrs. Wallace Combs Jr. is a member gave a baby doll party at the home of one of the members on Monday night. The girls looked cute in their dresses of white ruffles with pink and blue sashes. The house was decorated with spring flowers and ferns. At 11 o'clock the gentlemen were admitted when dancing and refreshments were indulged in.

Tinley Park Gift Shop—Imported white combinations for Mothers Day. Hand painted greeting cards. Lovely taffeta pillows \$3.00. Closing out wash dresses at \$1.00.

FOUND—Truck Tire owner can have same by proving property and paying for this ad.

TINLEY PARK GARAGE

Mrs. B. Andres entertained her friends and neighbors at a birthday party last Monday.

Mrs. Freeberg entertained Monday in honor of her birthday, bunco was played and refreshments were served.

The marriage of Esther Mesenbrink to Genge Stoekman will be solemnized Sunday, May 1st, in Zion Lutheran church, the Rev. Buddenhagen performing the ceremony.

A large crowd of relatives and friends gathered at the home of Herman Schultdt, in honor of Mrs. Schultdt's birthday the 22nd of April. The evening was spent by playing bunco and cards. Dancing to the music played by Mr. Ed. Reimer of Blue Island. At a late hour supper was served. Everybody present having a good time and wishing Mrs. Schultdt many more happy birthdays.

Rock Island Puts On Gas Motor Cars

A fleet of six cars, representing an entirely new type of gas-electric motive power, burning a petroleum distillate, was exhibited to the public by the Rock Island Lines at St. Louis, April 15; Kansas City, April 17; Des Moines, April 19; and Chicago, April 21. During the week of their exhibition, the cars were operated as a single train under its own power, making brief stops at the towns between the four principal cities mentioned, in order to give the public an opportunity to see this new type of rail motor transportation.

An important feature of the new motor cars is the fact that each unit is capable of pulling one or more regular passenger cars, thus making it possible ultimately to substitute this character of motive power in place of steam locomotives on many local trains of the Rock Island throughout the Middle West.

Each passenger car will seat 77 passengers, each.

Important Waterway

The Suez canal, opened in 1869, has a length of 101 miles, and a minimum width of 147 feet, 8 inches. The maximum draught of water allowed for vessels using the canal is 32 feet. The average time for transit through the canal is 15 hours 20 minutes. The canal is owned by a company, and Great Britain holds a controlling interest in the company.

Voice of a Snake

Besides the little hiss that seems to be common with most snakes they are generally incompetent to make any noise. There is one snake, however, the big water python or anaconda of Brazil, which gives a peculiar piercing cry at night.

Producing Liquid Air

Liquid air is a transparent, limpid and intensely cold liquid, slightly blue in color, and of about the same density as water. It is prepared by subjecting air to great pressure and then cooling it by its own expansion to a temperature below the boiling point of its constituents (nitrogen, 194 degrees centigrade; oxygen, 183 degrees centigrade). Its chief use is as a refrigerant.

And His Appendix?

History leaves out the interesting details. Did Methuselah keep his tonsils all that time?—New York Telegram.

Thumb Not "Finger"

Strictly speaking, the thumb should not be referred to as a finger and we have on each hand four fingers and a thumb. The term that refers to all five of the divisions of the hand is digit. However, the word "finger" has come to be used loosely in reference to the four digits and the thumb.

Seedless, Coreless Apple

A Quebec tree bears seedless, coreless apples of fine quality, says the Dearborn Independent.

Beware of Indecision

Indecision discourages the free movement of life; even mistaken action is better than none.—William D. Towne.

One Way to Look at It

Practiced says women's feet are getting larger. At any rate, they're proving more and more their ability to fill men's shoes.—Arkansas Gazette.
